

Dániel Blaskó

Frontend Developer

blaskoi@gmail.com | +36 30 330 9367

ABOUT ME

Software Engineer with over 10 years of experience in frontend development, specializing in building high-performance web and mobile applications using React, Next.js, Angular, and React Native within TypeScript environments. Proficient in modern state management (Zustand, Redux Toolkit), server-state and data-fetching architectures (TanStack Query), and modern styling solutions (Tailwind CSS, styled-components). Hands-on experience in building Node.js/Python REST APIs and automating CI/CD pipelines. Actively integrate AI workflows and agents to enhance daily engineering efficiency. Passionate about knowledge sharing, mentoring, collaborative team culture, and continuous technology adoption.

WORK EXPERIENCE

Frontend Developer | Medicare Egészségközpont | Budapest, Hungary 2026 - Present

- Internal & Public Web Application Development: Continuously developing and modernizing internal and client-facing enterprise healthcare systems with a full-stack/frontend focus (PHP Laravel, Inertia.js, React, TypeScript, Zustand, and TailwindCSS).

Senior Frontend Developer | WeCan Technology Zrt. | Budapest, Hungary 2024 - 2026

- AI-Powered Mobile App Architecture: Architected and developed the frontend for an LLM-driven React Native career orientation app for students based on Figma specifications (TypeScript, Redux Toolkit, TanStack Query, TailwindCSS).
- Cross-Platform Application Refactoring: Led the comprehensive refactoring and feature expansion of an existing React Native app using TypeScript, Redux Toolkit, and styled-components, significantly improving maintainability and rendering performance.
- Responsive Web Applications: Built scalable, bespoke React and Angular client interfaces tailored to business requirements from high-fidelity Figma designs (TypeScript, TailwindCSS).
- Backend Engineering: Actively contributed to backend services by implementing robust REST API endpoints and data web scrapers in Python (FastAPI).
- CI/CD & Code Quality Automation: Designed and managed GitHub Actions / Microsoft DevOps pipelines; integrated pre-commit hooks (Husky), NVM, ESLint, and Prettier to standardize workflows and elevate code quality.
- AI-Driven Engineering Workflow: Integrated AI developer tooling (Claude Code, Gemini agents) into the daily software engineering cycle to optimize development velocity.
- Team Leadership & Mentorship: Oversaw Git-flow release cycles, conducted thorough code reviews, and mentored onboarding junior/medior developers.

Frontend Developer | Swapp Hungary Kft. | Budapest, Hungary 2021 - 2024

- Legacy System Modernization & Refactoring: Executed an architectural rewrite and end-to-end refactoring of a custom Node.js and React SSR car subscription platform into a strictly typed TypeScript codebase.
- Careem Super-App Integration: Engineered and shipped a scalable, responsive React customer web application and successfully integrated it into the Careem Super-App serving millions of users.
- Payment Integration & Security: Integrated the Careem Pay payment gateway into the frontend flow using polling mechanisms; implemented OAuth login and JWT-based authentication for secure session management.
- A/B Testing & Feature Management: Implemented a controlled feature flagging architecture (GrowthBook) to facilitate gradual, zero-risk feature rollouts and data-driven evaluation.
- Cloud & Frontend DevOps (AWS): Automated CI/CD pipelines and frontend cloud hosting infrastructure on AWS to accelerate build and deployment velocity.
- Cross-Functional Collaboration: Partnered closely with backend engineers to design and consume efficient, secure RESTful API contracts.

Frontend Developer | Sense/Net Zrt. | Budapest, Hungary

2016 - 2021

- SaaS & Enterprise Portal Engineering: Delivered continuous frontend development, maintenance, and scaling for the company's flagship .NET Core-based Sensenet SaaS product.
- Modernization & React Ecosystem: Contributed to client-side architectural modernization by creating React demo and starter applications for third-party developers integrating with Sensenet SaaS.
- Code Quality & Unit Testing: Introduced unit testing suites and best practices to ensure client-side stability and regression-free releases.
- Responsive UI/UX Engineering: Built dynamic client-side web interfaces and responsive UIs utilizing Vanilla JavaScript, jQuery, and CSS3.
- Agile / Scrum Delivery & Jira Support: Collaborated in cross-functional Scrum teams in bi-weekly sprint cadences; provided ongoing enterprise client project support, bug resolution, and feature delivery via Jira.

Frontend Developer | 3TG Brokers | Budapest, Hungary

2014 - 2016

- UI/UX & Multilingual Web Development: Developed multilingual, pixel-perfect, and fully responsive websites from UI/UX designs in close collaboration with the design team.
- Performance Optimization: Monitored and optimized Core Web Vitals to maximize page load performance, SEO rankings, and overall user experience.
- Client-Server Integration: Implemented dynamic frontend modules (AngularJS, Bootstrap, HTML5, CSS3) and connected them to REST API endpoints within an ASP.NET MVC (Razor) architecture.
- Cross-Functional Teamwork: Coordinated with backend developers to streamline data flow and optimize API data payloads.

EDUCATION

Bachelor of Science (BSc) in Computer Science Engineering | Óbuda University – John von Neumann Faculty of Informatics 2016 | Budapest, Hungary

Earned a BSc Degree in Computer Science Engineering with a specialization in Software Technology.

Higher Vocational Certificate in Web Development | LIA Education Center | Budapest, Hungary

2010

Acquired comprehensive theoretical and practical expertise in software engineering and web development.

Secondary School Leaving Certificate | Szent-Györgyi Albert High School and Vocational School | Balassagyarmat, Hungary

2004

Secondary school graduation examination certificate.
